

I'm in great concern over the NAB wanting to control satellite radio. As an avid listener we pay for this service like cable/satellite TV. The programming is well worth the money. The traffic and weather stations are very informative. I occasionally check out the other cities and the one my son lives in. As far as traveling it is most beneficial. The programming on satellite with no commercials on music stations is the best idea ever. I live in florida so the weather channel comes in handy during hurricane season. Comedy stations for a little laughter to brighten my morning drive to work. Why would you want to take that away from us listeners. I strongly urge the FCC to reject the NAB's petition 04-160. sincerely, Judith Wyatt
